	Comments	<p>This entry was originally called <i>Jet Set Willy: The Storm Warning Mix</i> (file: jswstorm.rzx), as the version created by Russ Jukes and Darren Salt in 1999.</p> <p>It has now been renamed <i>Jet Set Willy: April Showers</i>, as I have determined that <i>The Storm Warning Mix</i> – which I had thought to be an improved version of <i>April Showers</i> – is in fact identical to <i>April Showers</i> with the exception of the code at #FEBB - #FED3, which does not affect the gameplay in any way (please see the JSW Central page for details).</p> <p>So while the RZX recording was made using <i>The Storm Warning Mix</i> file, it shows the completion of a game corresponding exactly to the original <i>Jet Set Willy</i> with the historic <i>April Showers</i> type-in applied.</p>

	Comments	In <i>Jet Set Willy Mono Plus</i> the player can select their own desired INK, PAPER, BRIGHT and FLASH options. Therefore, 224 colour versions of this variant could be recorded (it is not possible to choose the same value for PAPER and INK). The enclosed recording presents the completion of the game in just one sample colour pattern.
